SLIMLINE SERIES - ADA COMPLIANT SURFACE MOUNT FIRE EXTINGUISHER CABINET

A rolled edge 4" trim is the primary feature of this cabinet allowing it to be within the ADA limit of protrusion. The transparent acrylic window allows inspection of the fire extinguisher without the need to open the door. The standard door style is a partial window with a recessed door pull handle. Cabinets are fully painted in a white polyester enamel finish with several optional colors available. The cylinder lock mechanism does not require breaking of glass to gain entry. A flexible cam on the rear of the lock allows the door to open with a firm pull on the handle. An optional non-locking roller catch is also available on non-locking door styles.
